

NBS Chorus

Benefits of using Chorus Pro

NBS Chorus, our cloud-based specification writing platform, has revolutionised the way specifications are written. It can be accessed anywhere, on any device, with lightning-fast performance and ultimate scalability for all sizes of organisation.

There are two levels of the platform available, Chorus and Chorus Pro. The standard set of features available with a Chorus subscription enable users to produce high-quality technical specifications in an instant, helping to increase efficiency and manage risk.

The enhanced level of the platform, Chorus Pro, includes additional features that enable users to collaborate internally and externally on projects, create clear audit trails, and build bespoke branded templates and libraries of clauses.

Masters

Build up a library of commonly used clauses tailored to your organisation and your clients, ready to use on new projects in an instant. Save time, increase efficiency and easily share best practice.

Revisions

Keep track of changes made to the contents of your specification and compare the changes against previous versions in the publishing history.

Stylesheets

Create customised templates and save them to use on future projects, meaning your company's brand and style are automatically applied to your specification.

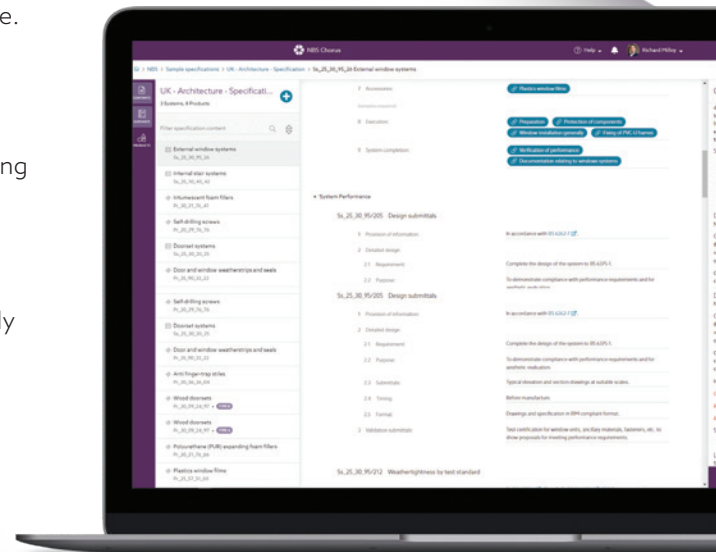

Specification Notes

Record project decisions directly in your specification as it's developed and share with the whole project team in real time.

Summary Schedules

Flag clauses relevant for early-stage specification decisions and quickly view these in a schedule for easy editing and publishing.

External collaboration

Bring the entire construction team together and invite multiple users from different organisations and locations into your project.

Export submittals & import into CDEs

Instantly export a full list of submittals from your spec in one click. Choose to export in a format suitable for a number of leading Common Data Environments, including Autodesk BIM 260, Newforma and Viewpoint.

Summary report

Export a high-level summary of everything being designed and specified, alongside a brief description and clarity over design responsibility.

Copy across organizations

Two organizations that are both developing specifications in Chorus can copy the specification articles/ clauses between each other.
